Summary

Full Stack Software Engineer with 1.3+ years of experience building scalable, high-performance applications using Node.js, NestJS, React, Next.js, PostgreSQL, MongoDB, and Redis. Core developer behind **CricRadio (100K+ users)** and contributor to trading and automation platforms, with proven skills in API optimization, real-time systems, debugging complex issues, and mentoring junior developers.

EXPERIENCE

Lifease Solutions LLP

Software Engineer - FullStack Developer

Dec 2024 - Present

Noida Sector 135, India

- Developed and launched **CricRadio**, a scalable Real-time **Cricket Product** used by **over 100k+ users** for live match data and updates
- Orchestrated the design and **deployment of highly scalable backend** systems using NestJS, Node.js, and efficiency by leveraging Docker for containerization and AWS for global accessibility, with optimized data handling through **MongoDB, Redis, and Mongoose ORM** integration.
- Optimized backend APIs** by migrating from Express to NestJS, reducing redundant queries and implementing Redis caching + ETag handling achieving **50% faster response times** and **35% lower DB load**.
- Optimized APIs** by minimizing payloads, applying efficient encoding and compression strategies, and **migrated the entire codebase from Express.js to NestJS** with **TypeScript** for improved scalability, maintainability, and type safety.
- Implemented **CI/CD pipelines** using GitHub Actions and Docker, automating build, test, and deployment processes for Node.js/NestJS applications, **reducing release time by 40%**.
- Deployed and managed apps on AWS (EC2, S3, RDS) with Winston & CloudWatch monitoring to ensure scalability, reliability, and fast issue resolution.**
- Integrated **logging and monitoring solutions** (Grafana, Prometheus, CloudWatch) to track system performance and errors in real-time.

Big Oh Tech (OPC) Pvt Ltd

Software Engineer (Node.js Developer)

May 2024 - Nov 2024

Noida Sector 2, India

- Improved system performance by 40% and reliability enhancement by implementing NestJS, Node.js, PL/SQL, Redis, Kafka, Sequelize ORM, JavaScript, TypeScript, and SonarQube.
- Developed the IGX-LDC Contract module**, enabling automated gas distribution and trading contracts between the Indian Gas Exchange (IGX) and Local Distribution Companies (LDCs).
- Collaborated with a team to develop a gas and energy commodities trading platform** and **designed APIs to manage sector priorities**, ensuring efficient access to trades based on predefined rules.
- Utilized Redis for caching frequently accessed data** (e.g., market rates, user sessions), significantly reducing database load and improving API response times.
- Contributed to key modules** including trade execution, market analysis, and user management, ensuring alignment with overall platform objectives.

TECHNICAL SKILLS

- Programming Languages:** Java, JavaScript, TypeScript
- Frameworks & Libraries and Tools:** Node.js, React.js, Express.js, Tailwind CSS, TypeScript, NestJS, PostgreSQL, MongoDB, MySQL, Bootstrap CSS, Postman, Netlify, Git, GitHub, Redis, Kafka, JWT, Docker, GitLab, SonarQube, SQL, AWS, AWS S3, GCP, gRPC, PostgreSQL, Grafana, Prometheus, Nginx, Docker, GitHub Actions (CI/CD), Jest
- Problem-Solving:** Solved over 500+ coding challenges on LeetCode using Java, enhancing problem-solving and algorithm skills.

EDUCATION

ABES Engineering College

B.Tech., Computer Science

2020 - 2024

India

PROJECTS

Cricradio | [Cricradio](#)

Lifease Solutions LLP

Oct 2024 - Present

Noida

- Architected **scalable backend APIs in NestJS and Express** to streamline complex data processing and drive functionality for both the **Android app and Admin Panel**.
- Implemented a **WebSocket server** to deliver instant live updates to 100k+ active users.
- Utilized **DigitalOcean Spaces** for media storage with **CDN delivery** for faster content access.
- Integrated **AWS SNS** for broadcast and targeted push notifications, boosting user engagement.

- Integrated **Python scraping services** with **Redis Pub/Sub** for real-time match and weather data flow.
- Applied **Redis caching** to optimize response times and reduce database load.
- Monitored and optimized performance using **New Relic**, ensuring system reliability and quick issue detection.
